Wayne Shelton, PhD selected to ASBH CECA Committee

AMBI faculty member, Wayne Shelton, PhD, was recently given the honor of becoming a new member of the ASBH Clinical Ethics Consultation Affairs (CECA) Standing Committee for 2011. CECA was originally established for three main purposes: (1) to vet products related to clinical ethics consultation (CEC) and recommend approval to the ASBH Board, such as the revised Core Competencies; (2) to advise the Board how to proceed related to CEC certification/credentialing/accreditation; and (3) to advance the quality of clinical ethics consultation by identifying standards of practice and developing resources to allow more individuals to achieve standards of practice.
